- Javascript
- Nodejs
- DBMS(Mongodb)
- AWS S3
- Git
- Algorithms
- Postman
- REST API
- Redis
- Expressjs
- Reactjs(Basic)
- C,Html,css(basic)
- JAVA(basic)

PROJECTS

E-commerce   githublink   [Dec 22]

- Shopping-cart: I have created the back end of an E-commerce website with multiple APIs for users, products, and cart orders. Like : Amazon,Flipkart,Myntra ets. In this project, I use Aws S3, Nodejs, and many npm libraries just as multer, express,

URL-Shortner   githublink   [Dec 22]

URL shortening is used to create shorter aliases for long URLs. We call these we use Redis, shortened aliases "short links." Users are redirected to the original URL when they hit these short links. Short links save a lot of space when displayed, printed, messaged, or tweeted. Additionally, users are less likely to mistype shorter URLs.

Open-to-intern   githublink   [Nov 22]

- internship: Have created for applying internships for a period of time duringit which a student can apply by searching colleges. In this project, AWS S3 to use external API and creates the URL of PDF with the help of AWS S3 Link. In this project, we have to take the input from each student and make sure the student must validate it

Book Management   githublink   [Nov 22]

Book Management Have created a project like a library anyone can register then read and give ratings Like->kindle this is the first project I made. In this project we used to create a database of books by using Mongodb and make sure all books have unique id by which we pick the book freely. using JWTtoken authentication and authorization to make security.

Blog Site   githublink   [Nov 22]

- Role: Backend Developer, Tech Stack: Javascript, Node, MongoDB. Blogging Site: Have created a backend for blogging where anyone can signup and create their blogs, Like One Magazine and URBAN
